FREEZING TECHNOLOGY

cryoair
mini premium cold air device

Targeted cooling. Precise treatment.

Whether in sports, wellness or medical treatment, cryotherapy is a modern method used in studios and medical practices: In cold air therapy, a precise amount of extremely cold air is blown directly onto the skin's surface, locally extracting warmth from the body. This provides pain relief and helps inhibiting inflammation.

Focused treatment

Using targeted cold air helps treat rheumatic diseases and assists with therapy following operations. Possible treatment areas include analgesia, back pain, inflammation inhibition, restricted movement and neurodermatitis.

A new body feeling

Locally extracting heat from the body alleviates pain for athletes, improves joint mobility, and relieves swelling.

Cool beauty

Cold air is often used to great success in the beauty industry. The localized use of cold air can tone tissue and stimulate the production of collagen – structural protein that is responsible for fresher-looking skin with reduced wrinkles.

The advantages of our cold air treatments

With the cryoair mini premium the cold air is cooled down to a temperature of -26°F , and blown onto the desired area of the patient's or clients body using a hose with adjustable air flow. In contrast to other cooling applications, you will benefit in multiple ways with the cryoair cold air therapy device:

Higher cooling gradient without risk of freezing

Constant cooling over a longer period of time

Airflow-adjustable

The area of the body being treated remains accessible and movable

No need to take medicines

Optional accessories (from left to right)

Glass plate

Treatment hose therapy 67 inch, different nozzles

2-way-articulated arm for optimal hose placement with clip-on-system

Laser hose 79 inch, different models

Reasons for cryoair coldair devices

Nitrogen-free

Cooling with the cryoair cold air device requires no nitrogen whatsoever. This makes its usage safe, gentle and efficient.

Economical

Our innovative technology has been optimized over many years of research and is characterized by particularly low operating costs and highest reliability.

Competent

Quality from a market leader offering consulting, development and customer service.

Variety

Large selection of accessories tailored to your needs.

Sophisticated

New, highly efficient technology, small footprint, easy to operate.

Technical data of the cryoair mini premium device

Rate of airflow	350 - 1,200 l/min
Therapy Temperature	-26°F
Power supply	~115V
Power line frequency	60Hz
Therapy power consumption	ø 500W

Trust the leading manufacturer

MECOTEC is a pioneer in the development of electrical refrigeration equipment and can draw on a wealth of experience over the company's 25-year history. By opting for products from MECOTEC, you're choosing TÜV- and UL-certified technology that sets the bar – and comes 100% from Germany.

MECOTEC is a place for specialists and team players alike. From research and development to manufacturing, sales and customer service, we work closely together towards a common goal: developing the very best ideas and offering the finest products.

With our two locations for development, production and logistics in Germany and our branches in Italy, France, the Middle East, the USA and Southeast Asia, we serve the needs of our clients worldwide.
