## OUR PROMISE TO YOU

We care about the well-being of your pet and will provide you with guidance, knowledge, and tools needed for them to be healthy. Halotherapy will provide better respiratory function, improved skin health and a shiny beautiful coat. We are here to help you help them achieve optimal wellness and beauty. In the same way that many people are shifting towards non-invasive, holistic treatments for illness, animal owners are increasingly open to alternative therapies for their beloved pets.

Our goal is to provide an all-natural medical alternative to control and improve the symptoms of asthma, allergies, ear fungus, mange/itch, skin irritation and inflammation using the fundamental healing principles of pure salt. Halotherapy is a complete detox of the skin, ears & airway. Our results prove the best way to heal naturally without pharmaceuticals.

## ABOUT HALOTHERAPY

Halotherapy is exposure to kinetically activated pure pharmaceutical grade salt. Dry salt air is dispersed into the HaloPet-product by a halogenerator. Salt absorbs into the skin, ears, fur and airway to remove allergens, toxins and foreign substances. It is antibacterial, anti-microbial, anti-fungal and anti-inflammatory. Halotherapy is a drug free, natural way to promote better breathing, healthier skin/fur and endurance. It will improve mange, itch and overall wellness.

Halotherapy is currently being used to treat:

- Kennel cough
- feline infectious respiratory disease
- feline bronchial asthma
- pneumonia secondary to feline and canine respiratory viral infections ringworm in felines and canines
- feline eosinophilic granuloma complex
- chronic sinusitis in felines and canines

**"Halotherapy will be the most significant paradigm shift in the practice and veterinary medicine since the induction of surgical and therapeutic lasers years ago. We can now treat many of these medical conditions without the use of toxic antibiotics and anti-fungal this will help with the worldwide drug resistance problem with many antifungal antibacterials."**
